

LAKE COUNTY ROAD COMMISSION

POLICY # 1008: STREET NAME SIGNS

STATEMENT OF POLICY:

The Road Commission will install street name signs, which have been purchased by the Townships on all certified county roads. There will be no labor charged for the initial installation of street signs, but the Townships will be billed for parts such as posts or hardware required for the installation. The Road Commission will install signs at intersections of certified county roads but will not install signs on those roads which are not certified county roads.

The Road Commission will invoice the Townships for maintenance on street signs. Repairs performed on street signs will be subject to equipment rental and material charges for billable time and hardware required to perform the repair.

All hardware and materials for signs will be subject to Road Commission standards. The Township will be billed for the replacement of non-standard hardware if required to properly repair a sign on all certified county roads.
