

LAKE COUNTY ROAD COMMISSION

POLICY # 1023: Spring Weight Restrictions

STATEMENT OF POLICY:

All loads shall have a 35% reduction of normal legal loadings.

All roads shall have a 35 mph speed limit.

At the Road Commission's discretion, roads that are not maintained during the the winter months may be used to haul normal legal loadings. These roads must access directly onto a class A road. The Road Commission will not repair the road during this time, but will supply barricades if necessary to close road during this time. The Road Commission will repair after hauling is completed.

The possibility exists that the Road Commission will remove weight restrictions from gravel roads earlier than from paved roads. This is solely at the discretion of the Road Commission and it is not guaranteed this will happen.
